DIV. OF OIL, GAS & MINING

Mr. Nielson:

The Fillmore Field Office (FFO) of the Bureau of Land Management (BLM) received your proposal for a minerals exploration Notice on August 22, 2013. Your proposed Notice is located in the Miller Canyon area of Millard County, Utah in aliquot parts of section 11, Township 19 South, Range 14 West, Salt Lake Meridian. Your proposed Notice has been assigned the BLM case file number UTU-90076. Please refer to this case file number in future communication regarding your Notice.

Your Notice proposal includes most required information but is incomplete. Additional information is required. In order to obtain authorization for surface disturbance you must submit a document in which the area involved is shown, total extent of surface disturbance, method of testing, amount of sample to be taken, restoration to be performed, and type of equipment to be used to accomplish these tasks. Your submission includes a map of the area involved and specifies that you will return fill material to the drill holes. However, this additional information is needed:

- Extent of surface disturbance: Drill pad size, length and width of any improvements to existing roads, length and width of any new roads, and surface water runoff protection;
- Sample sizes to be removed from the 12' holes;
- Tests to be performed on samples; and
- Type of equipment: Drill size and type, drill hole diameters, method to plug drill holes above the fill material, and road and drill pad building equipment to be utilized.

The required information will be used to determine impacts, if any, of the project upon other resources and the location environment. The information will also be used to calculate a Financial Guarantee, or reclamation bond, that must be submitted prior to authorization.

You should be aware that under an authorization you may be required to submit all findings of your exploration, sampling, and testing. Also, samples may not be sold or bartered. If you have any questions about these information requests, please contact Duane Bays, Fillmore Field Office Natural Resource Specialist, at (435) 743-3115.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael D. Gates", followed by a large, stylized flourish or scribble.

Michael D. Gates
